360° HEAT DISTRUBUTION

Practical, compact and portable, the new under the table infrared heater is efficient and economical.

It is safe for the environment with zero carbon monoxide emissions and hardly affected by wind, making this unit cost effective and environmentally friendly.

The heater tower is covered with cool-touch technology material which makes it safe to the touch and prevents accidental burning.

Designed to fit under most tables, it can be used indoor as well as outdoor. Its compact size makes it easy to transport from one room to the next.
